

YOLANDA SIVUYILE MEJANE

Junior Python & Full-Stack Developer

(+27) 82 804 0168 | yolandamejane@gmail.com | Gonubie, South Africa

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Junior developer with one year of professional experience: Python and Django development at Kandhgroup, building features for the CA-Live platform, and full-stack web and mobile development at Triangle Labs (React, Node.js, Dart, Supabase). Studying for a BSc in IT with a Data Science focus and holding the AWS Cloud Practitioner certification. Experienced in taking features from wireframe to deployment, and looking for a role building reliable, scalable software.

WORK EXPERIENCE

Python Developer – Kandhgroup

April 2026 – Present

South Africa

- Built a Lesson Tracker in Django for CA-Live tutors to log student consultations (subjects, topics, notes, follow-ups, status), with student, tutor and admin roles, Google Sign-In, a calendar view and role-based dashboards.
- Built an interactive learning platform (Learn, Practice, Assess) with Django REST Framework, React, TypeScript, Tailwind CSS and MySQL: split-screen lessons, a question bank and timed exams, as a standalone service designed to plug into CA-Live's subscriber access.
- Built an automated daily newsletter service in Django: OpenAI summarises sourced accounting and tax news, an admin approves each edition, and a scheduled job sends approved ones through Mailgun, with duplicate-send protection and full logging.

Junior Web Developer – Triangle Labs

July 2025 – January 2026

Remote | South Africa

- Built mobile and web applications end to end using FlutterFlow and custom Dart code.
- Designed and managed backend services on Supabase (PostgreSQL) and Firebase, including database design.
- Delivered features through the full lifecycle: wireframing, database design, deployment and maintenance.
- Joined client meetings to gather requirements and advised on UI/UX and technical feasibility.
- Maintained project documentation and used Notion and Slack for team communication and technical support.

SKILLS

Languages: Python, C++, JavaScript, TypeScript, SQL, Dart, HTML, CSS

Frameworks & Libraries: Django, Django REST Framework, React, Redux, Node.js, Express, Tailwind CSS, Bootstrap, Chart.js

Databases & Backend: PostgreSQL, MongoDB, MySQL, Supabase, Firebase

APIs & Integrations: REST APIs, OpenAI API, Mailgun, Google OAuth

Cloud & Tools: AWS, Vercel, Render, Git, GitHub, VS Code, Cursor, Figma, Notion, Slack

Low-code & Prototyping: FlutterFlow, Bubble.io, Lovable AI, V0 by Vercel, wireframing

PROJECTS

Tech Blog [Live](#) | [Code](#) React, Node.js, Express, MongoDB, Vercel

- Blog with Google sign-in: server-side token verification, HTTP Only session cookies, and ownership and admin rules enforced by the API, with automated tests.

Fitness Tracker [Live](#) | [Code](#) React, MongoDB, JWT authentication

- Full-stack workout tracker: log sets, reps and weight, and track progress over time.

E-Commerce Store [Live](#) | [Code](#) React, Redux

- Capstone built from a Figma design: search, cart and checkout, with state managed in Redux.

E-Commerce Dashboard (group project) [Live](#) | [Code](#) React, Chart.js

- Group project: e-commerce dashboard with a login page and Chart.js data visualisations.

EDUCATION & CERTIFICATIONS

BSc Information Technology (Data Science) – Eduvos

2025 – 2027

Bootcamp in Full-Stack Web Development – Melsoft Academy

2024

BSc(Eng) Civil and Environmental Engineering – Wits University(Incomplete)

2019

Matric Certificate – Hudson Park High School

2017

AWS Certified Cloud Practitioner

2025
